## CMOs & CROs

incl. Focus on Pharma Packaging

**SPECIAL**

# European Biotechnology

Life Sciences and Industry **Magazine**

## Special: CMOs & CROs Get on Board!

**➤ Publication date: 6 October, 2017**

---

### Hot topics in biomanufacturing, packaging & contract research

---

From preclinical development to market approval, biopharma companies increasingly rely on outsourcing to biomanufacturing experts and contract research and contract packaging organisations: from hits to leads and proof-of-concept and from DoE, QbD over scaleable process development to customised and even continuous USP, DSP, polishing, sterile filling including serialisation. However, as novel formats for biologics and biosimilars emerge, diversification through special know-how is key to market success. New formulations, delivery forms, trial formats and patient enrolment strategies also challenge the growing industry.

---

### Present your expertise

---

CMOs & CROs, providers of modular production plants, equipment and software specialists as well as QBD experts will have the opportunity to present their latest products, processes, and equipment in this special. EuroBiotech Magazine goes out to decision makers throughout the entire European Life Sciences sector. Take advantage of to the journal's highly relevant readership and grab this opportunity to target your audience!

---

### Topics to be covered

---

**CMOs/CPOs:** single use equipment, media/cell line development, glycooptimisation, antibody conjugates, packaging, fill & finish, QbD, process development automation, DoE, GMP for cell/gene therapy, serialisation

**CROs:** Companion diagnostics, gene editing, cancer immune therapies, biosimilar analytics, interventional/non-interventional studies, animal/cell models, ADMET, imaging capabilities, advanced trial designs & statistics for adaptive trails, EMR-guided patient recruitment

**Editorial Deadline**  
18-09-2017
