Bioprocessing

Get on Board!

Hot topics in bioprocessing

According to the latest CPHI Annual Survey, CDMOs will see a significant increase in demand for biologic therapy manufacturing. With the tailwinds of pandemic-related manufacturing capacity expansion, CDMO sales will rise from \$120.6 billion last year to \$171.3 billion in 2026, with a focus on specialty drugs, growth in nuclear medicine, advances in cell and gene therapies (\$12.4 billion in 2026) and single-use devices (\$20.8 billion in 2026). But live microbial therapies, antibody conjugates, nanoswitches and protein degraders are also expected to expand. New and cost-efficient processes and streamlined supply are seen as success factors of the future. Contract manufacturers that have all capacities in-house or specialised CDMOs are predicted to have good opportunities in emerging markets..

Present your expertise in the journal of the official media partner

CDMOs and biotechs, single-use suppliers etc will have the opportunity to present their latest research, products, processes, and equipment in this special. EUROPEAN BIOTECHNOLOGY magazine will go out to decision makers at Bio-Europe Spring and to the entire European Life Sciences sector. Take advantage of to the journal's highly relevant readership and grab this opportunity to target your audience!

Topics to be covered

Services & equipment: cell line selection, process development & upscaling, process monitoring, QbD, single use equipment, integrated services, media development, cell culture, glycoengineering, conjugation, formulation, fill & finish, DSP, continuous processing, ex vivo genetic engineering, TCR engineering, IgG-like bispecifics, AAV and lentiviral vector technology, plasmid engineering, modular UPS and DSP, antibody engineering, purification, polishing

Editorial Deadline
27-2-2023
