Bioprocessing

Get on Board!

Hot topics in bioprocessing & precision fermentation

Bioprocess development in the biopharmaceutical sector and the emerging food sector is the focus of this special, which focuses on microbial, cell-free, enzymatic and cell-based production. From process development for various biologics formats to cell proliferation, differentiation and scale-up, service providers and plant manufacturers are booming. You too can showcase your expertise in these growth markets.

Make your cluster, CDMO or solution visible

Whether biopharmaceuticals such as ADCs or other conjugates, hormones, antibodies, gene and cell therapies, or novel foods from bacteria, fungi, insects or cells, SMEs need support in developing, financing, scaling up and producing their biotech products. EUROPEAN BIOTECHNOLOGY goes out to decision makers throughout the European life science sectors. Take advantage of the journal's highly relevant readership and grab this opportunity to target your audience!

Topics to be covered

In view of the exploding demand for new therapeutic formats such as mRNAs, cell and gene therapies, molecular machines or conjugates, vegan or cell-based protein, fat, coffee or dairy products, service providers with expertise in formulation, process development, cost-effective scaling and approval are in demand. Make your industrial, pharmaceutical or biotechnology expertise visible. EUROPEAN BIOTECHNOLOGY offers an editorial environment in which you can present your expertise in an author article, advertorial, interview and more. Our experts will be happy to advise you.
