Bioprocessing

Get on Board!

Hot topics in bioprocessing

Time to market is a critical factor when you think about COVID-19-vaccines or recombinant protein drugs. Commercial production for billions of people is a great challenge. Furthermore, pharma giants such as Novartis are currently ramping up production capacities for new drug formats such as cell & gene therapies. But also live microbial therapies, conjugates of or engineered antibodies will be back, when the pandemic waves will become flatter. New and cost-effective processes are needed to make them a business case. Contract manufacturers that have all the capacities in-house to develop a biologic/advanced therapy GMP compliantly from preclinical stage to the filled & finished product have good chances in the emerging new markets.

Present your expertise in the journal of the official media partner

Drug developers, CDMOs and experts will have the opportunity to present their latest research, products, processes, and equipment in this special. European Biotechnology Magazine goes out to decision makers throughout the entire European Life Sciences sector. Take advantage of the journal's highly relevant readership and grab this opportunity to target your audience!

Topics to be covered

Services & equipment: cell line selection, process development & upscaling, process monitoring, QbD, single use equipment, media development, cell culture, glycoengineering, conjugation, formulation, fill & finish, DSP, continuous processing, ex vivo genetic engineering, TCR engineering, IgG-like bispecifics, AAV and lentiviral vector technology, plasmid engineering, modular UPS and DSP, antibody engineering, purification, polishing

Editorial Deadline
19-2-2021

Editor:
Thomas Gabrielczyk
Tel.: +49-30-264921-50
Fax: +49-30-264921-11
t.gabrielczyk@biocom.de

Booking Deadline
26-2-2021

Contact Marketing:
Oliver Schnell
Tel.: +49-30-264921-45
Fax: +49-30-264921-11
